

Geotextiles and Geomembranes

Geotextiles and geomembranes are used in a wide range of applications, including soil stabilization, erosion control, and water management. They are made from various materials, including natural fibers, synthetic fibers, and polymers. The choice of material depends on the specific application and the environmental conditions. Geotextiles are typically made from woven or non-woven fibers, while geomembranes are made from synthetic polymers. They are used in a variety of settings, including roads, bridges, and water treatment plants. The use of geotextiles and geomembranes can help to reduce the environmental impact of construction projects and improve the durability of infrastructure. They are also used in agriculture, where they can help to conserve water and improve soil fertility. The use of geotextiles and geomembranes is a key component of sustainable construction and infrastructure development.

CUTTING ACCORDING TO YOUR REQUIREMENT

CUT AS YOU LIKE

**RELEASE PAPER
HOOK AND LOOP**

V S

**TRANSPARENT FILM
HOOK AND LOOP**

◀ **NEAT HOOK TAPE**

*Dense and neat hook
better sticking to the
plush surface*

DENSE LOOP ▶

*High-quality nylon
material, Long
service life*

Good adhesion

Strong adhesive

本公司生產之2005型號之4000型號之產品，均符合SGS.TUV ISO9001 BSCI等國際認證，品質優良，價格公道，歡迎各界人士垂詢。
